

# + 5 / - 5 Book Project (Plus Five, Minus Five)

Get the large white paper needed for this project from Mrs. Renz. List a least five events in your famous person's life. You can include more if you like. Arrange the events on the timeline according to the dates they happened and how they felt about the events. For example, a +1 (plus 1) means it was an "okay" event in their life. A +5 (plus 5) would mean "Wow! This was an amazing event in the person's life." A -1 (minus 1) means the event was less than okay, and -5 (minus 5) would be the worst thing you can imagine in that person's life. Draw lines connecting the events like a line graph. You will need to figure out the person's age by subtracting his or her age from the year the event happened. EX:  $1869 - 1847 = 22$  years old.
