

Bart Goes Hang Gliding

$$4 \times 4 = 16$$

Bart loved hang gliding. He learned to fly when he was 14. The only thing that he didn't like was hiking his hang glider to the top of the hill so he could fly down. He wished he was 16 so he could drive, and that he had a four wheel drive to get to the top of the hill. He went to Bernie's Burgers and got a job working after school. By the time he turned 16, he saved enough money to buy a 4 by 4. He was so happy because his trip up the hill was almost as much fun as flying down.
