

Name: Mrs. Renz

Driving Directions from Redmond, Oregon to: St. Louis, Missouri

Estimated Driving Time: 30 hours, 44 minutes

Total Miles Driven: 1947.59 (round to 1948 miles)

SAMPLE

1. Figure out how much the gas will cost for this trip.

Ask your family this information:

Make or kind of car: Subaru Legacy

Average number of miles we get per gallon in our car

(round to the nearest whole number: 25 miles per gallon)

Current Gas Price in Redmond: \$1.89

	Miles driven	Price of Gas	Gallons of gas needed (round to the nearest gallon)	Miles per gallon your car gets (mpg)	TOTAL COST
Example	1948 miles	\$1.89	78 gallons	25 mpg	\$147.42

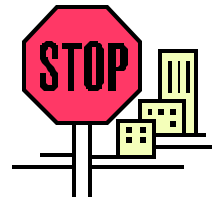

EXAMPLE:

Figure out how many gallons of gas you will need:

1948 miles driven ÷ 25 miles per gallon = 77.92 gallons of gas needed (round to 78 gallons)

Now figure out the gas cost:

78 gallons of gas needed X \$1.89 = \$147.42 needed for gas

Remember that this cost estimate just gets you to your destination and does not include any side trips!

2. Figure out how many hours you will be driving on this trip.

	Hours of driving time (round to the nearest hour)	Number of Days it Takes to Drive There
Example	30 hours, 44 minutes - round to 31 hours	4 days

EXAMPLE:

31 hours of driving time ÷ 8 hours per day = 3.875 days (round to the nearest day) so it would take you 4 days to drive there.
